The following characters have specialized meaning:

Special Characters	Description
, () [These characters end a text token.
= > < !	These characters end a text token because they signify the start of a field operator. (! is special: != ends a token.)
` @ \Q < { [!	These characters signify the start of a delimited token. These are terminated by the end character associated with the start character.

Results 1 - 10 of 10 **short listing**

- 1** High-level test generation for design verification of pipelined microprocessors 94%
 David Van Campenhout , Trevor Mudge , John P. Hayes
Proceedings of the 36th ACM/IEEE conference on Design automation conference June 1999
- 2** The gould NP1 system interconnecting 92%
 D. J. Vianney , J. H. Thomas , V. Rabaza
Conference proceedings on International conference on supercomputing June 1988
The Gould NP1 is a multicomputer multiprocessing system designed for high performance and parallel processing required in diverse scientific and engineering applications. The NP1's basic building block is a dual-processor single bus system which can be expanded up to eight processors over four system buses. This paper discusses the overall design and implementation of the NP1 system interconnection in particularly the inter-system bus link which interconnects four system buses to ...
- 3** Early experience with message-passing on the SHRIMP multicomputer 82%
 Edward W. Felten , Richard D. Alpert , Angelos Bilas , Matthias A. Blumrich , Douglas W. Clark , Stefanos N. Damianakis , Cezary
